EXIST SOFA
Designed by Ramak Radmard

Our constructions are pure and honest, making use of high quality materials specifically chosen for each different application. Exist is designed to last. It allows for cleaning and servicing, ensuring a long life. The upholstery is easy to remove and replace. This level of simplified functionality gives high user friendliness and reduces wear points.

Back/Base

The back and base are made using bent maple veneers, a material that has the advantage of being tough yet flexible. Our use of bentwood gives the Exist additional flexibility, allowing the frame to move with the user.

Upholstery

The seat and backrest upholstery are meticulously hand-crafted in maharam® and Kvadrat® fabrics or Elmo® leathers. The upholstery are designed with user comfort in mind. The cushions are covered in two layers, the upholstery and the protective inner liner; this allows the quick and easy cover changes.

Cushions

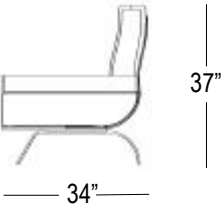

The seat and back pads are made from high-grade fire resistant polyurethane, structured in coordinated layers of varying heights and hardness. This creates a clean and linear expression, yet has all the ergonomic features hidden within. The layers of foam are encased with a high-grade non-woven polyester and then covered with a protective inner liner.

Legs

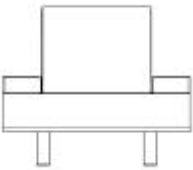

The legs are made from nickel plated steel.

Sizes

The Exist is available in a variety of sizes from 1 to 5 person configurations.
