The Zeinna coffee table is designed as the perfect companion to the Exhale lounge chair. It has a distinctly shaped glass tabletop and cast aluminium legs that use the same curves found in the front legs of Exhale. The legs are joined to the glass by aluminium mounting blocks, with wood details perfectly matching the finish of your Exhale lounge chair.

Legs

The legs are made from cast aluminium, with a smooth brushed surface and a clear protective coating.

Tabletop

The tabletop is made from a 19mm thick glass sheet, which is ground and polished to its characteristic shape. This material has the advantage of being extremely strong as well as safe, due to its unique fracture pattern.

Mounting

The legs are fastened to an aluminium disc, which are permanently bonded to the glass tabletop.

Mounting caps

Finally the table is assembled with matching wooden details, which convey a sense of harmony with the Exhale lounge chair.

Sizes

The Zeinna is available in two sizes 67" & 30"
